FDA ACTION ALERT

Dear FDA,

I encourage you to grant the proposed health label for soy products. 8 4 0 6 '00 MAR 23 P2:26

Heart disease claims the lives of more than 500,000 people each year in the U.S. alone. The research has shown that soy proteins, when part of a diet low in saturated fat and cholesterol, may reduce the risk of heart disease. Allowing manufacturers of soy products to make this claim will help consumers make more informed choices about the foods they eat. Armed with this information, consumers can choose foods that will help lower their risk of heart disease, the number one cause of death in the U.S. It also may provide additional motivation for manufacturers to produce these foods and for stores to carry them, which would increase consumer access to these healthful products.

Sincerely,

(Sign here)
